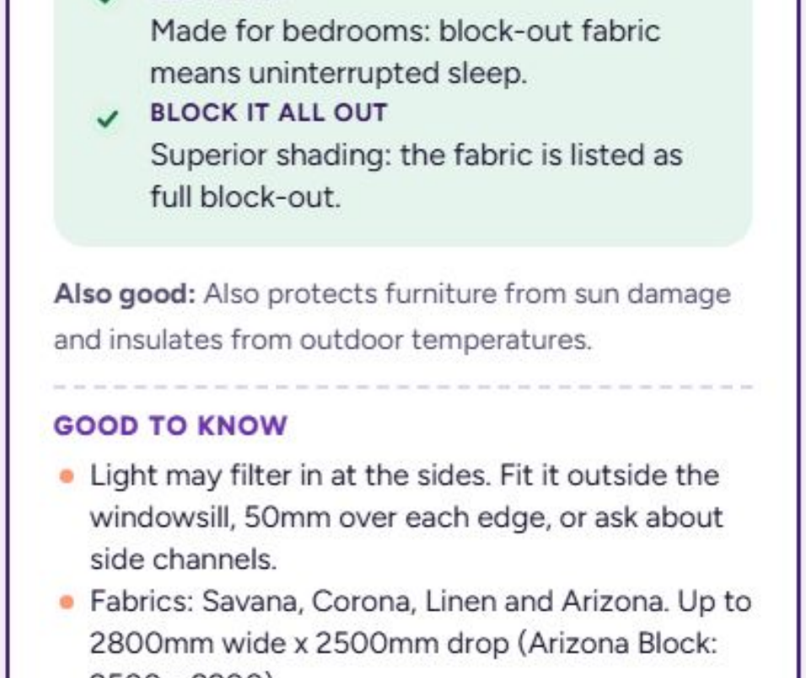
The blinds that fit

Every match says why it fits, using what the current Blind Specialist site says about that blind.

Your answers: Bedroom · Block it all out · Inside · Change answers



Best match

ROLLER BLIND

Block-out roller blind

A roller blind in block-out fabric that stops sunlight.

WHY IT FITS

- ✓ **BEDROOM** Made for bedrooms: block-out fabric means uninterrupted sleep.
- ✓ **BLOCK IT ALL OUT** Superior shading: the fabric is listed as full block-out.

Also good: Also protects furniture from sun damage and insulates from outdoor temperatures.

GOOD TO KNOW

- Light may filter in at the sides. Fit it outside the windowsill, 50mm over each edge, or ask about side channels.
- Fabrics: Savana, Corona, Linen and Arizona. Up to 2800mm wide x 2500mm drop (Arizona Block: 2500 x 2200).

Ask Sonja about this · What is this?

Also fits

ROLLER SYSTEM

Day/Night roller system

Two roller blinds in one window: a Shade Weave one for the day and a block-out one for the night.

WHY IT FITS

- ✓ **BLOCK IT ALL OUT** One of the two rollers is a block-out fabric.

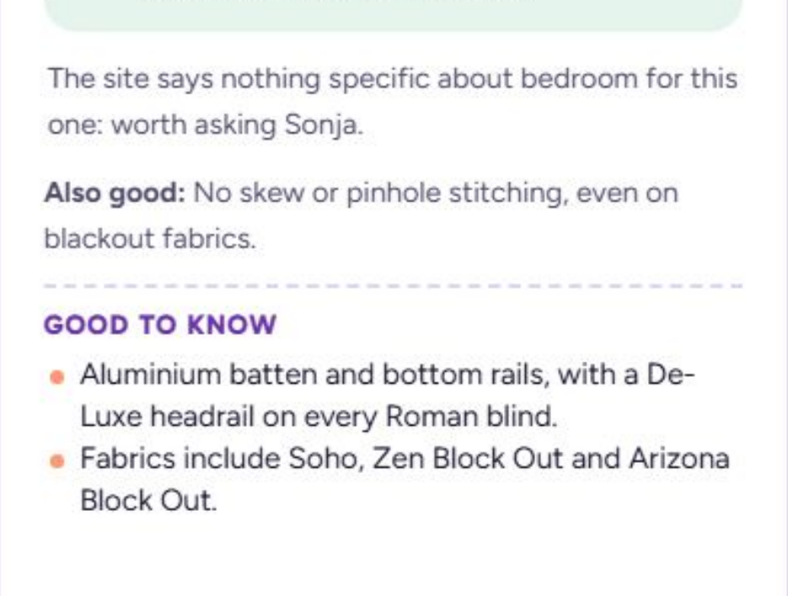
The site says nothing specific about bedroom for this one: worth asking Sonja.

Also good: Choose one Shade Weave and one block-out, for example Corona Block with Shade Weave.

GOOD TO KNOW

- The 1-bracket system needs 9cm of depth inside the windowsill.
- The 2-bracket system gives better light control, with no light gaps along the sides.

Ask Sonja about this · What is this?



Worth a look

ROMAN BLIND

Roman blind (groove system)

Fabric that folds up into perfectly straight pleats.

WHY IT FITS

- ✓ **BLOCK IT ALL OUT** Block-out fabrics are available (Soho, Zen and Arizona Block Out).

The site says nothing specific about bedroom for this one: worth asking Sonja.

Also good: No skew or pinhole stitching, even on blackout fabrics.

GOOD TO KNOW

- Aluminium batten and bottom rails, with a De-Luxe headrail on every Roman blind.
- Fabrics include Soho, Zen Block Out and Arizona Block Out.

Blind types explained

Zebra or Day/Night? A plain-English guide

Every blind on the Blind Specialist site, in one sentence, with a photo, what it suits and what to watch for.

ROLLER BLIND

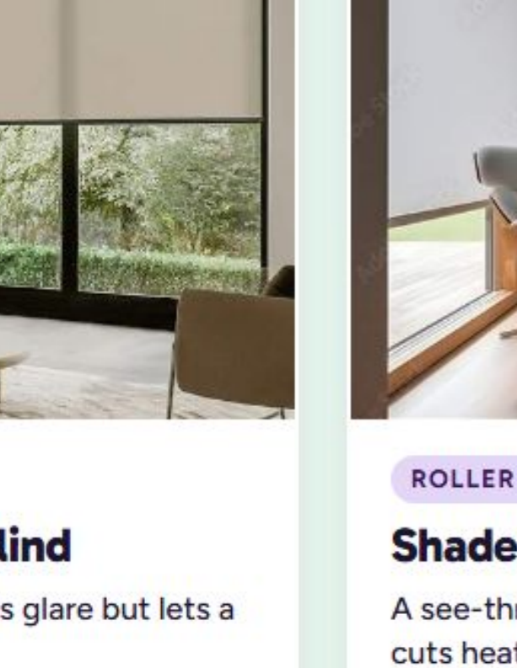
Zebra

One blind, two layers

Translucent and opaque stripes sit in two layers. The front layer moves past the back one, so the stripes line up for an open or a closed effect.

Comes with a cassette.

vs



ROLLER SYSTEM

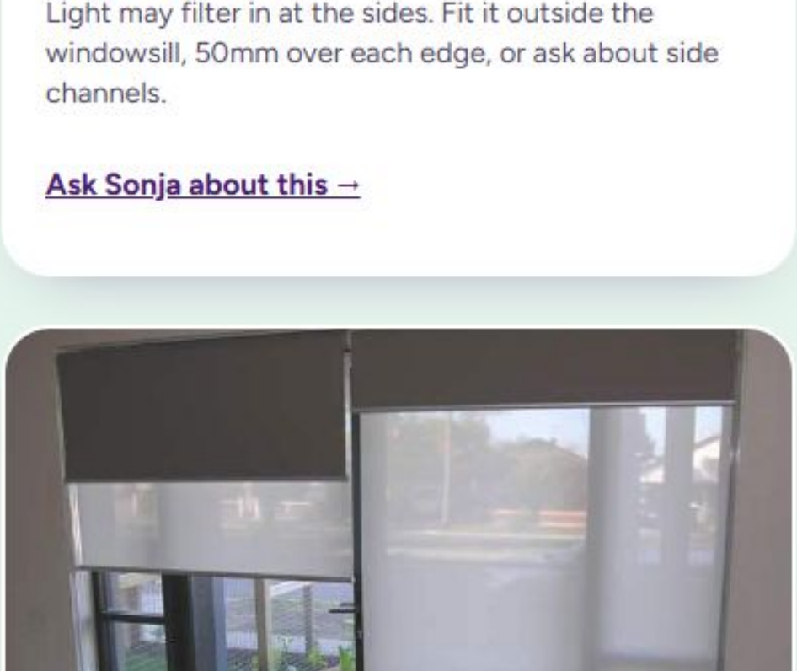
Day/Night

Two blinds, one window

A Shade Weave roller keeps glare down by day, and a block-out roller gives you the dark and your privacy at night.

The 1-bracket version needs 9cm of depth in the sill.

All · Roller · Venetian · Vertical & panel · Folds & cells · Outdoor & roof



ROLLER BLIND

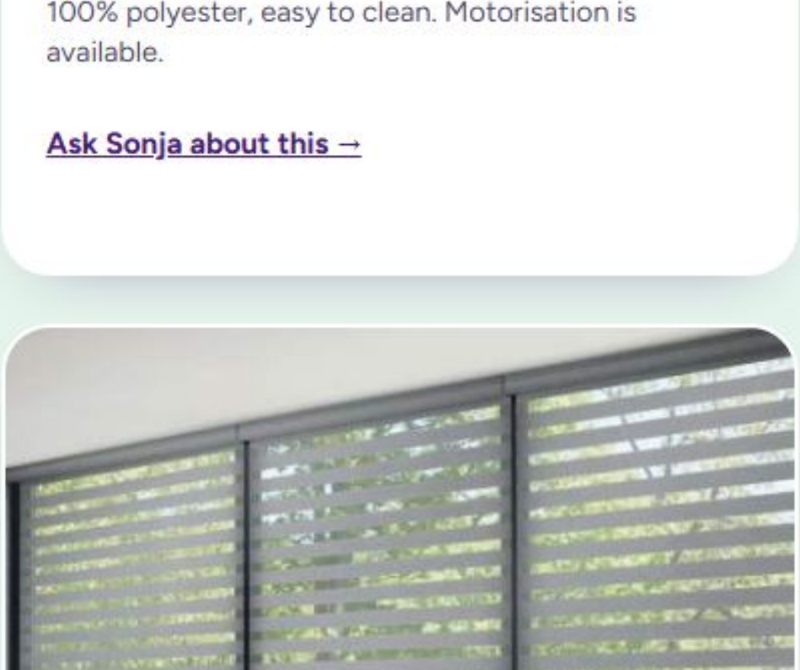
Block-out roller blind

A roller blind in block-out fabric that stops sunlight.

GOOD FOR Bedrooms and boardrooms.

WORTH KNOWING Light may filter in at the sides. Fit it outside the windowsill, 50mm over each edge, or ask about side channels.

Ask Sonja about this →



ROLLER BLIND

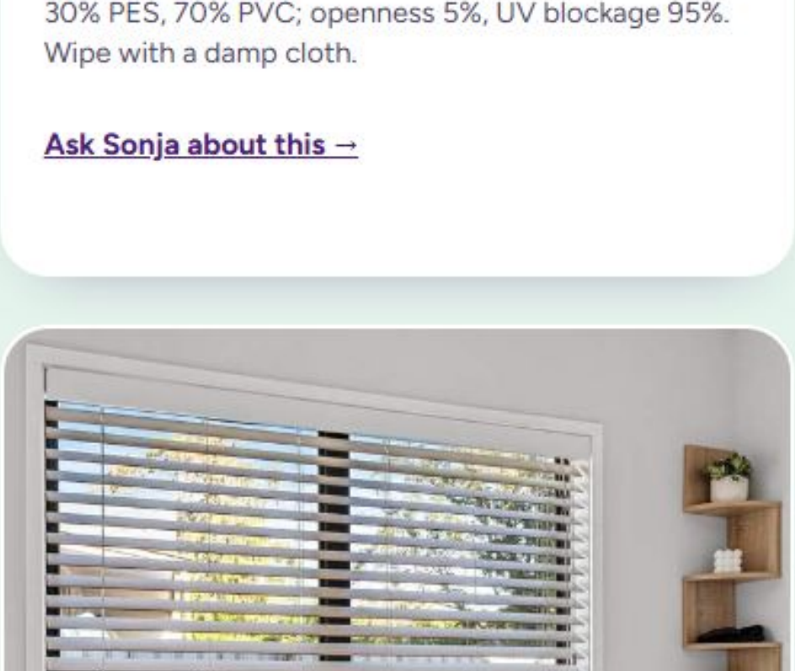
Light-filtering roller blind

A roller blind in a fabric that cuts glare but lets a little soft light through.

GOOD FOR Rooms where you want light without the glare.

WORTH KNOWING 100% polyester, easy to clean. Motorisation is available.

Ask Sonja about this →



ROLLER BLIND

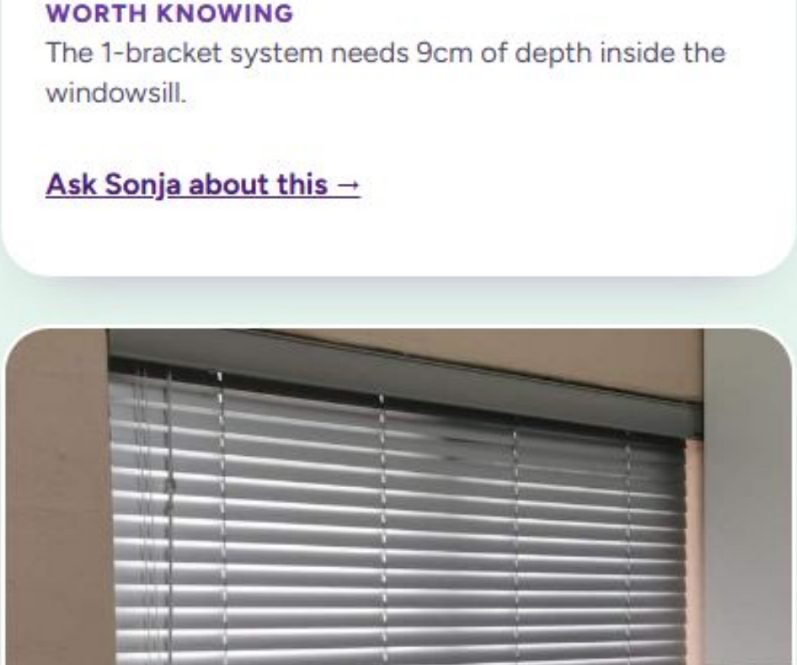
Shade Weave roller blind

A see-through sunscreen fabric on a roller: it cuts heat and glare while you can still see out.

GOOD FOR Sunny windows where you want to keep the view.

WORTH KNOWING 30% PES, 70% PVC; openness 5%, UV blockage 95%. Wipe with a damp cloth.

Ask Sonja about this →



ROLLER SYSTEM

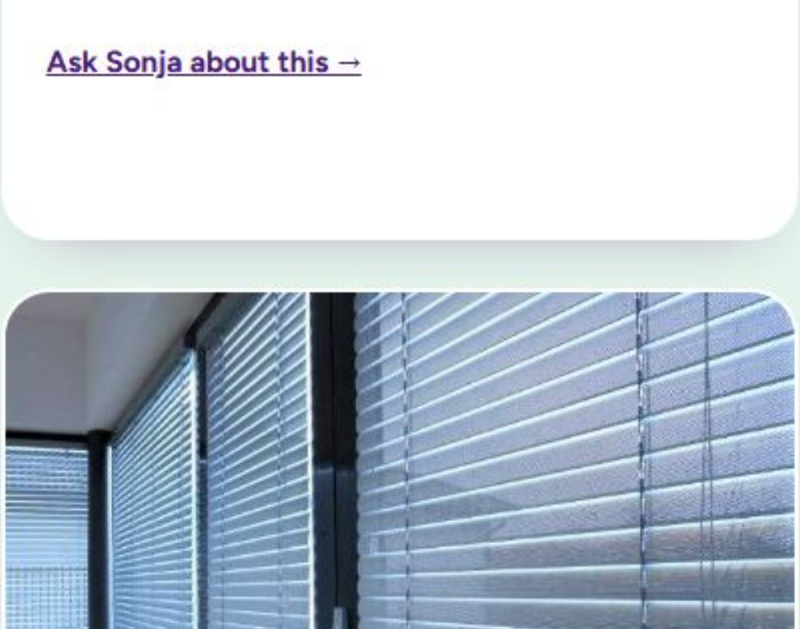
Day/Night roller system

Two roller blinds in one window: a Shade Weave one for the day and a block-out one for the night.

GOOD FOR One window that has to do two jobs.

WORTH KNOWING The 1-bracket system needs 9cm of depth inside the windowsill.

Ask Sonja about this →



ROLLER BLIND

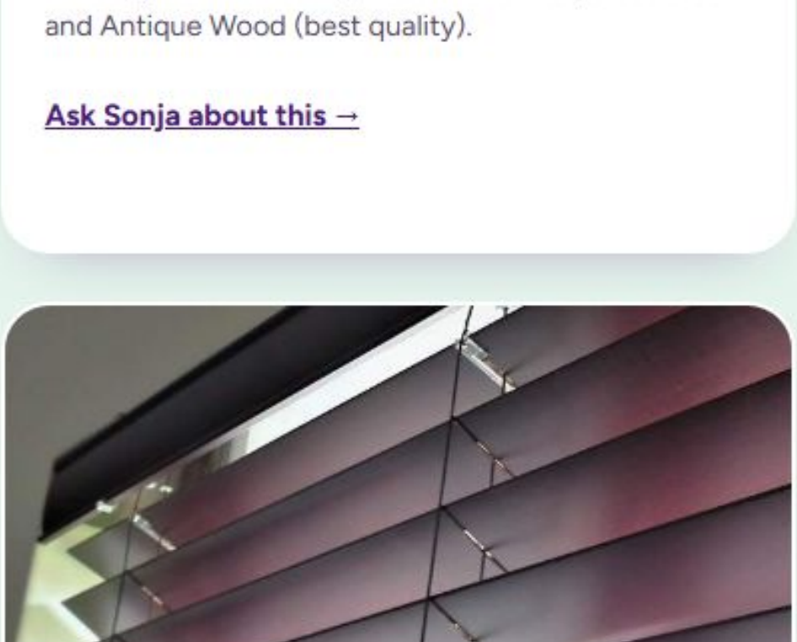
Zebra (double) roller blind

One blind with two layers of translucent and opaque stripes that slide past each other.

GOOD FOR Living areas where you want to fine-tune the light.

WORTH KNOWING All Zebra blinds come with a cassette.

Ask Sonja about this →



VENETIAN BLIND

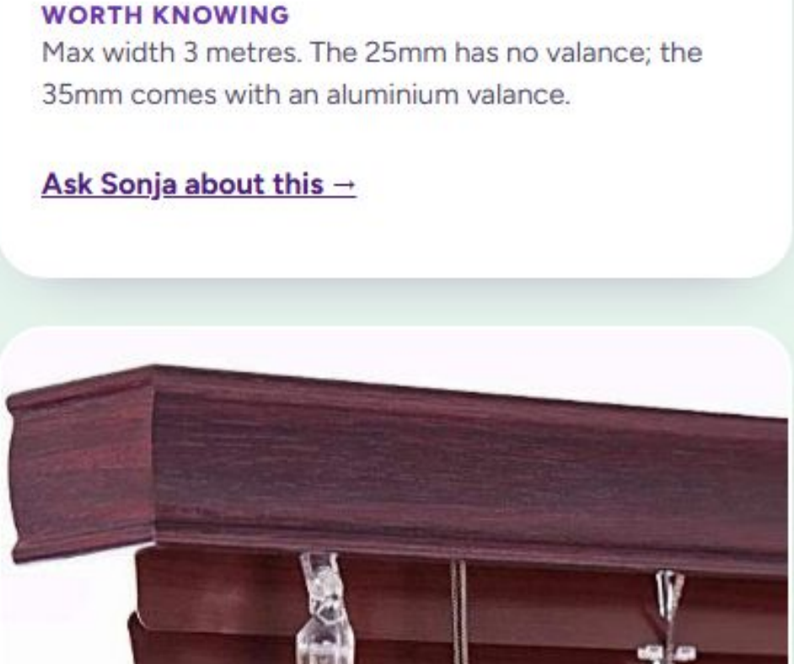
Imitation wood Venetian

A 50mm Venetian with slats that look like timber but resist moisture.

GOOD FOR Bathrooms, kitchens and coastal homes.

WORTH KNOWING Three types: Ecowood (most economical), Plaswood and Antique Wood (best quality).

Ask Sonja about this →



VENETIAN BLIND

25 & 35mm aluminium Venetian

Slim aluminium slats in plain, perforated and hammer finishes.

GOOD FOR Smaller windows in kitchens, bathrooms and kid's rooms.

WORTH KNOWING Max width 3 metres. The 25mm has no valance; the 35mm comes with an aluminium valance.

Ask Sonja about this →

VENETIAN BLIND

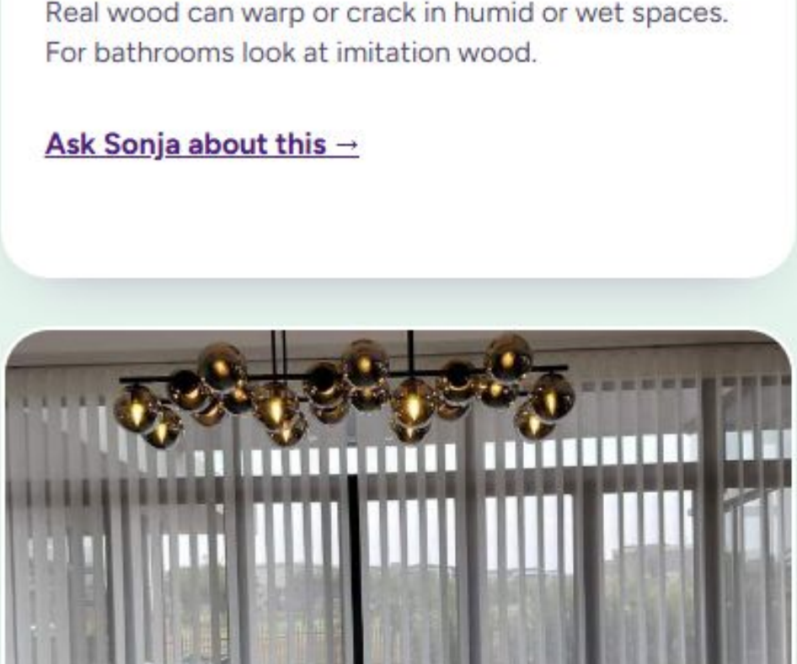
50mm aluminium Venetian

Wider aluminium slats for bigger windows and doors.

GOOD FOR Bigger windows and doors.

WORTH KNOWING An aluminium valance is an optional extra.

Ask Sonja about this →



VENETIAN BLIND

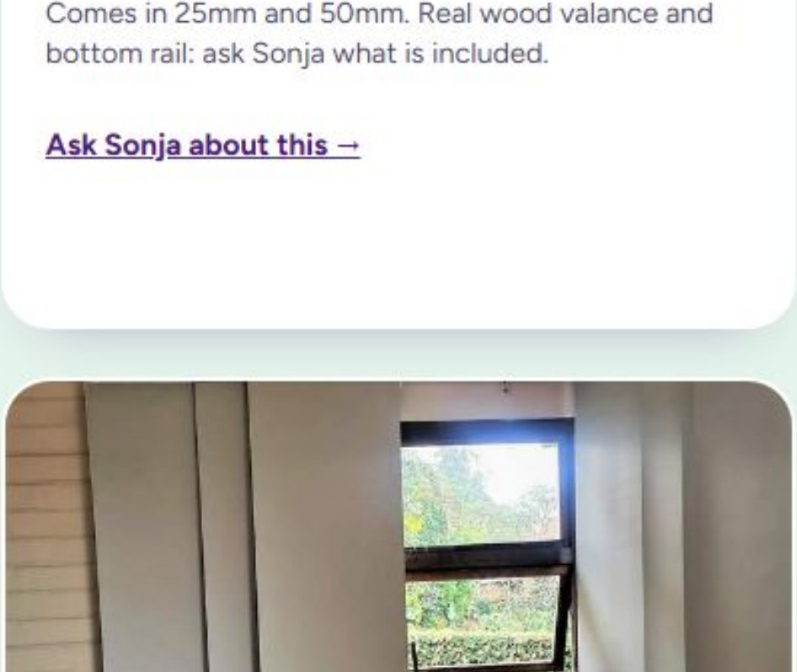
Real wood Venetian (basswood)

50mm diamond-coated basswood slats: real timber.

GOOD FOR Rooms where you want real wood.

WORTH KNOWING Real wood can warp or crack in humid or wet spaces. For bathrooms look at imitation wood.

Ask Sonja about this →



VENETIAN BLIND

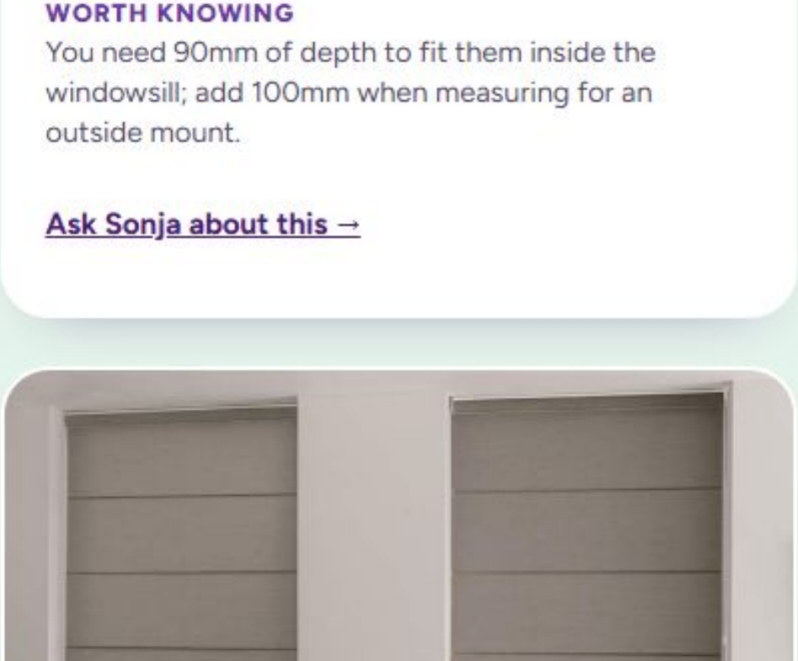
Aluwood (wood-look aluminium)

Aluminium slats with a genuine wood valance and wand: the wood look, much lighter.

GOOD FOR Large windows and doorways.

WORTH KNOWING Comes in 25mm and 50mm. Real wood valance and bottom rail: ask Sonja what is included.

Ask Sonja about this →



VERTICAL BLIND

Vertical blinds (with or without chains)

Tall vanes hanging from a track that turn or draw back with a pull of the cord.

GOOD FOR Large windows, patio doors and offices.

WORTH KNOWING You need 90mm of depth to fit them inside the windowsill; add 100mm when measuring for an outside mount.

Ask Sonja about this →

VERTICAL CURTAIN

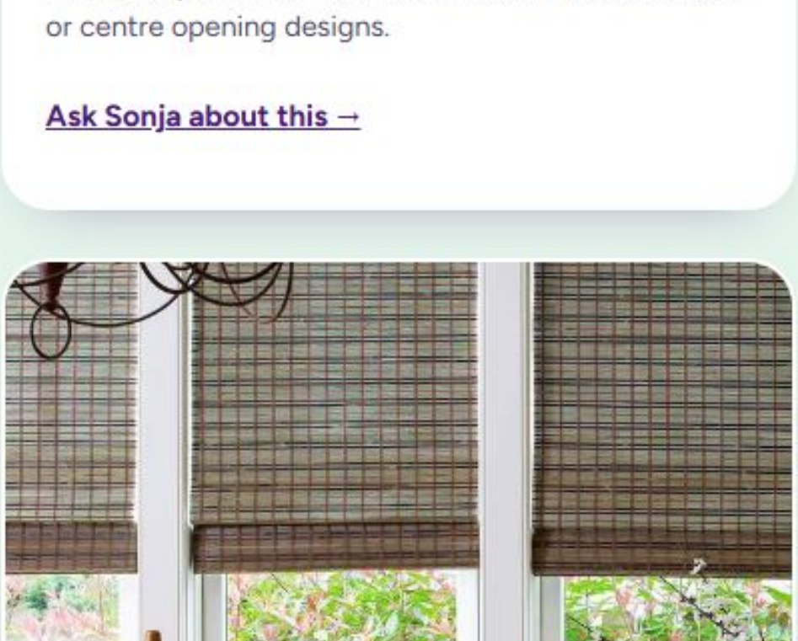
Curti Voile vertical curtains

Flowing fabric vanes with no weights or chains: you can walk straight through them.

GOOD FOR Large windows and bi-folding doors.

WORTH KNOWING Up to five metres wide on a single vertical track.

Ask Sonja about this →



PANEL BLIND

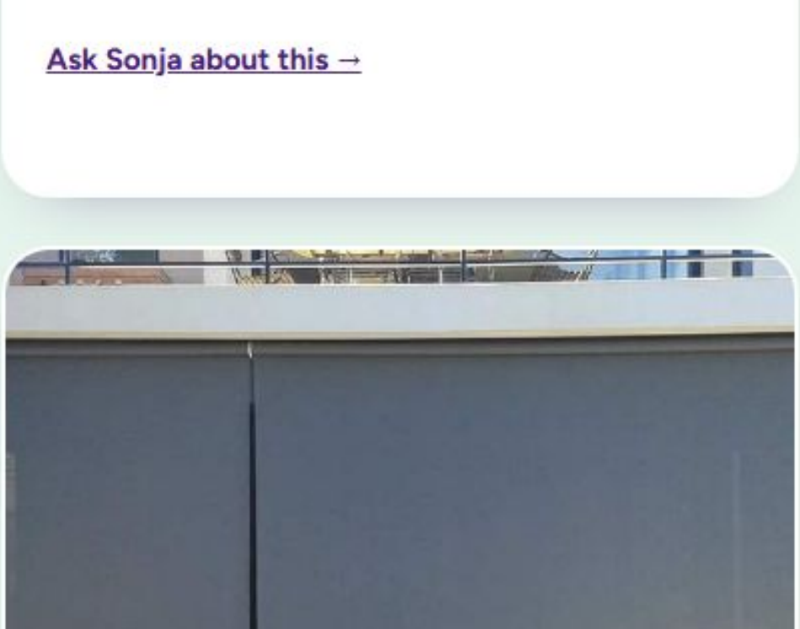
Panel blinds (material or bamboo)

Wide sliding panels on a track that glide across the glass.

GOOD FOR Sliding doors and large windows.

WORTH KNOWING Individual panels are 450mm to 1200mm wide, in side or centre opening designs.

Ask Sonja about this →



ROMAN BLIND

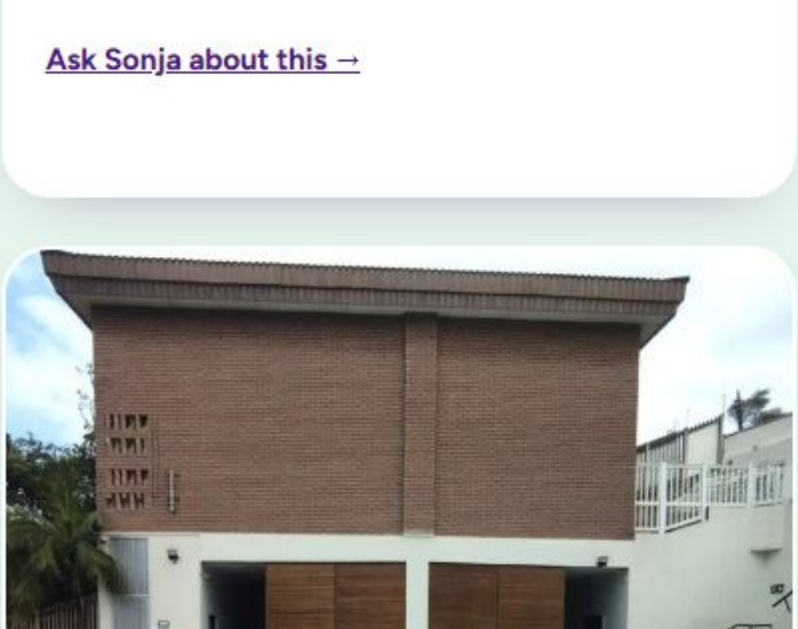
Roman blind (groove system)

Fabric that folds up into perfectly straight pleats.

GOOD FOR Rooms where the look of the fabric matters.

WORTH KNOWING Aluminium batten and bottom rails, with a De-Luxe headrail on every Roman blind.

Ask Sonja about this →



HONEYCOMB BLIND

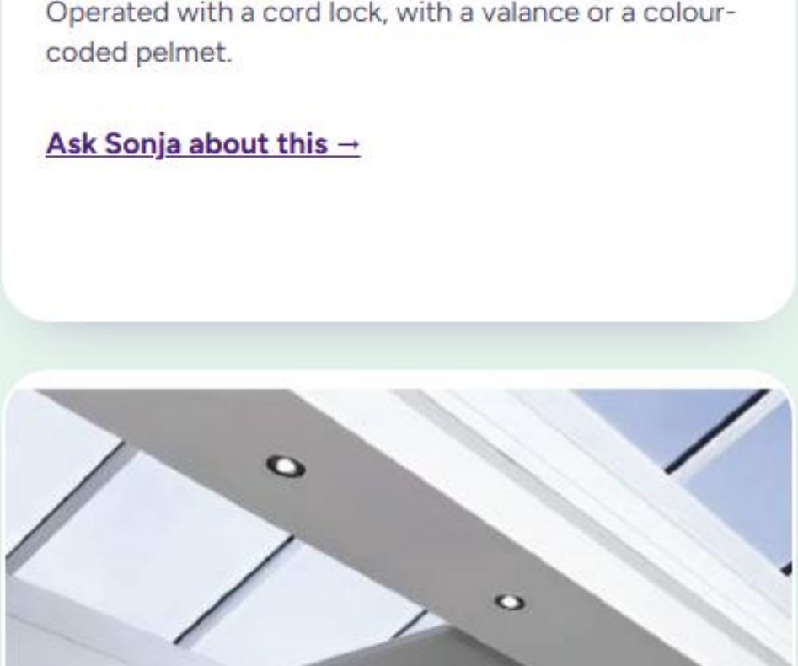
Honeycomb (cellular) blind

A pleated blind made of cells that trap air.

GOOD FOR Windows of various sizes where insulation matters.

WORTH KNOWING 100% non-woven polyester, double celled. Corded for ease of use.

Ask Sonja about this →



ROLLER BLIND

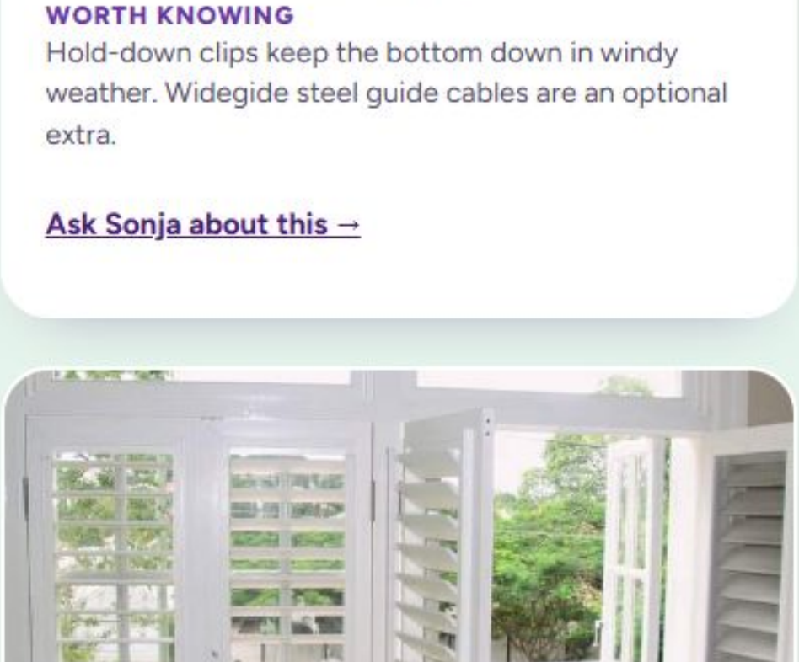
Bamboo & woven wood roller

Roller blinds woven from bamboo, rattan, jute, grass and reeds.

GOOD FOR Rooms with a natural, earthy feel.

WORTH KNOWING Operated with a cord lock, with a valance or a colour-coded pelmet.

Ask Sonja about this →



OUTDOOR ROLLER

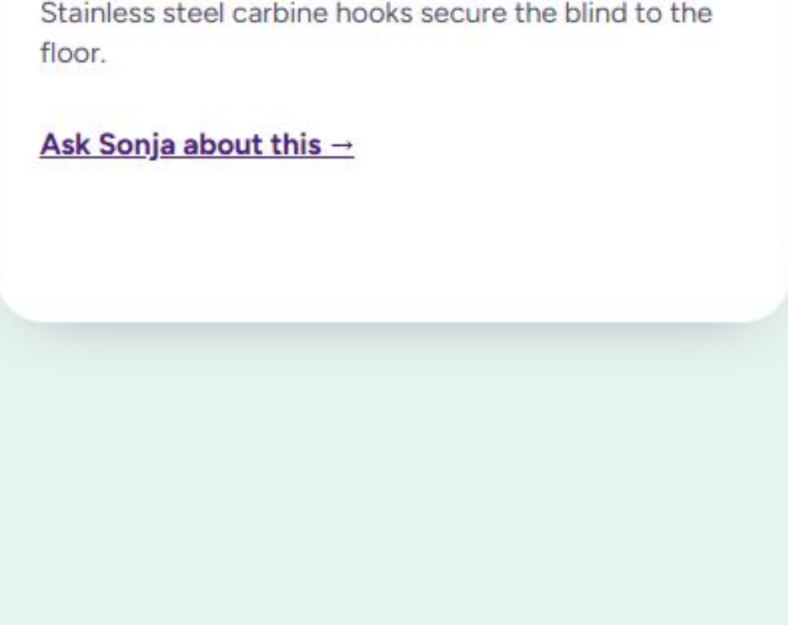
Outdoor Shade Weave roller blind

A Shade Weave (Luxsol) screen for patios, lowered and raised with a removable crank handle.

GOOD FOR Patios that get too hot or too glary.

WORTH KNOWING Hold-down clips keep the bottom down in windy weather. Widegide steel guide cables are an optional extra.

Ask Sonja about this →



OUTDOOR ROLLER

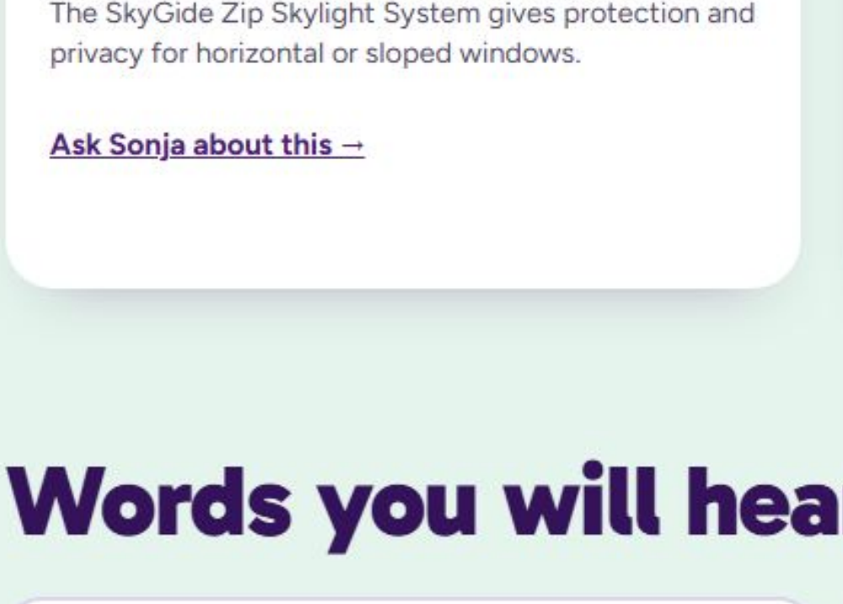
Laguna Bamboo outdoor roller

A bamboo roller blind with a weatherproof coating for outdoor areas.

GOOD FOR Turning a patio into an extra room.

WORTH KNOWING Stainless steel carbine hooks secure the blind to the floor.

Ask Sonja about this →



SKYLIGHT BLIND

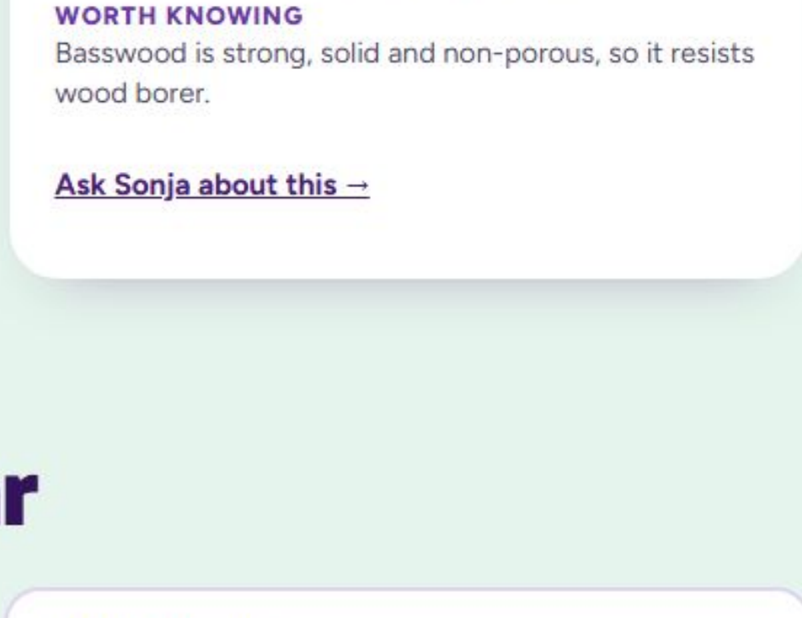
Skylight blinds

Blinds for horizontal or sloped windows, in block-out or Shade Weave fabric.

GOOD FOR Roof windows and skylights.

WORTH KNOWING The SkyGide Zip Skylight System gives protection and privacy for horizontal or sloped windows.

Ask Sonja about this →



SHUTTERS

Basswood & aluminium security shutters

Custom-made shutters in basswood, or aluminium security shutters.

GOOD FOR Security, strength and a choice of stains.

WORTH KNOWING Basswood is strong, solid and non-porous, so it resists wood borer.

Ask Sonja about this →

Words you will hear

Block out	A fabric made to stop sunlight. It protects furniture from sun damage, but light can still creep in at the sides of a roller.
Light-filtering	A fabric that cuts glare but lets a little soft light glow through.
Shade Weave	A see-through sunscreen fabric. It reduces heat and glare and lets you keep your view.
Openness	How open the weave of a sunscreen fabric is. The Shade Weave fabrics listed are 5% open.
Inside mount (top fix)	The blind sits inside the window recess. You need at least 60mm of depth, and 90mm for vertical blinds.
Outside mount (face fix)	The blind sits on the wall or frame outside the opening, overlapping each side, the top and the bottom by at least 50mm (100mm for vertical).
Drop	The height of the blind. Measurements are given as width x drop, in millimetres.
Cassette	A neat cover over the rolled-up fabric. Optional on rollers, standard on Zebra blinds.
Headbar	A roller style that makes it easier to do your own fitting.
Pelmet or valance	A cover along the top of the blind that hides the headrail or pulley.
Chainless	A vertical blind with sealed bottom weights instead of a bottom chain: fewer repairs, safer around children and pets.
Motorisation	An optional extra on rollers. The one price on the site: Mastervue battery motor R2385, 1-channel remote control R343 (listed with Prem-Weave).

What happens next

From finder to fitted

1. **Pick your blind** Use the finder, or the blind types above. Ask Sonja if you are torn.
2. **Measure** Measure yourself with our guide for an extra 10% discount, or have us measure: call-out from R300, refunded when you order.
3. **Get a free quote** Send your details by form, WhatsApp or email. The quote comes by email.
4. **Order and fit** Accept the quote, pay the deposit, and a measurer checks your sizes in Durban and surrounding areas. Delivered or fitted at your home or office.

3-year carry-in guarantee On all blinds.

Custom-made So returns are not accepted: choose with care.

Fitting R110 to R150 per blind plus call-out. Panel R200, outdoor R500.

Measure it yourself Ask about self-measuring insurance: 3% of the total.
